PROFESSIONAL SUMMARY

Passionate and business-minded Full-Stack Developer with 3+ years of experience specializing in ReactJS, NodeJS, TypeScript, and React Native. Proven track record of architecting scalable web/mobile applications, building complex role-based enterprise portals, and integrating AI-driven data pipelines. Expert in optimizing application performance, implementing advanced SEO strategies, and delivering human-centered UX overhauls that drive tangible product growth.

KEY SKILLS

- **Frontend:** ReactJS, React Native, TypeScript, JavaScript, Redux, Context API, Bootstrap, HTML5, CSS3
- **Backend & Cloud:** NodeJS, ExpressJS, MongoDB, Firebase, RESTful API Design & Integration
- **Optimization & Tools:** Search Engine Optimization (SEO), React Helmet, XML Sitemaps, Git/GitHub, Code Splitting & Performance Tuning

PROFESSIONAL EXPERIENCE

VOPA Technology

Junior Software Developer | May 2025 – Present

Project: Nipun (AI-Powered FLN Assessment Platform)

- Engineered the core frontend architecture for an AI-driven Foundational Literacy and Numeracy (FLN) testing application utilized by educators and government officials for state-level data verification and decision-making.
- Developed an interactive AI-driven data annotation pipeline in React, streamlining raw assessment ingestion and accelerating the machine learning training data cycle.
- Designed and implemented multi-role user workflows, enabling real-time assessment tracking for teachers and secure, robust reporting dashboards for government administrators.
- Conceptualized and built a comprehensive Help & Support module from scratch, significantly lowering onboarding friction for non-tech-savvy users and reducing troubleshooting overhead.

Project: Full-Stack NGO Platform Overhaul

- Spearheaded the ground-up full-stack migration of the organization's public platform, architecting and deploying 100+ custom RESTful APIs in Node.js and MongoDB.
- Redesigned the user experience (UX) from a cluttered template into a high-converting, fluid "Hero-to-CTA" framework with a warm, custom UI featuring bespoke visuals tailored for public engagement.
- Optimized heavy-media data layers to seamlessly render over 400+ vibrant assets (images/videos) without compromising core web vitals or page load speeds.

Stemmone Cloudworks Pvt Ltd

Software Developer | January 2024 – February 2025

- Architected and delivered responsive web and mobile applications leveraging React.js, TypeScript, and Firebase.

- Designed and deployed core enterprise features, including HR & Payroll automation tools, subscription/payment gateways, and secure role-managed administration portals.
- Optimized application discoverability using React Helmet, boosting organic traffic by 25% through structured XML sitemaps and enhanced search engine crawling.

Human Cloud Private Ltd

Software Developer Intern | March 2023 – September 2023

- Collaborated on building and refactoring cross-platform web and mobile applications using React.js, React Native, Redux, and Bootstrap.
- Refactored the codebase for the "Property Nexus" application, utilizing performance tuning and code-splitting to improve application speed and responsiveness by 40%.
- Contributed key features and engineered UI bug fixes for the "Fluent Pet" platform, directly enhancing user engagement and interface interactions.

Vardhishnu Tech Private Ltd

Mechanical Design Engineer | May 2019 – February 2022

- Led 3D prototyping, comprehensive CAD modeling, and industrial fabrication workflows.
- Managed on-site project supervision, coordinated cross-functional industrial visits, and streamlined engineering design documentation.

EDUCATION

Bachelor of Engineering (Mechanical) | Graduated 2020 (62.06%)

G. H. Raison College of Engineering, Pune, India
